WORK EXPERIENCE

Software Engineer, Turkcell Group Company Atmosware August 2024 – Present

- Contributed to **end-to-end development** of Turkcell's AI projects, including UI implementation with **Next.js** and custom **CSS**.
- Integrated **RESTful APIs** for real-time data, supported architecture decisions, and assisted in DevOps and deployments.
- Acted as **Scrum Master** to lead agile ceremonies, improve team collaboration, and optimize workflows.

Machine Learning Intern, OptiWisdom July 2023 – Nov 2023

- I worked on a **machine learning project** on **"Customer Buying Behavior Prediction"** and wrote a paper about it at the end of the internship.

EDUCATION

Bachelor of Science in Computer Engineering, Akdeniz University July 2020 – July 2025

- Built real-world software projects during coursework, applying core engineering and development principles.
- Gained proficiency in teamwork and problem-solving through collaborative software projects.

Frontend Development Bootcamp, Turkcell Geleceği Yazarlar March 2024 – June 2024

- Completed an intensive 3-month frontend development bootcamp focused on JavaScript, React, Next.js, and CSS.
- Built several real-world team projects, gaining hands-on experience in collaborative UI development and modern web architecture.

PROJECTS

Raporla

A task reporting tool built for teams and organizations. Enables team leads or members to create and send weekly reports with one click. Managers can view detailed reports and track work progress across the organization.
